

CAMSAIL PROGRAMME

2022 – 2023

Winter Programme for Sailors **Living In or Near Cambridge**

Our club, now in its thirteenth season, has a membership of around 50. Some of the members have or have had their own yachts, others enjoy sailing by chartering or as crew, others have sailed in the past or are simply interested in things nautical!

Our club welcomes a connection with the Cruising Association (www.theca.org.uk) through their Suffolk Section. The Camsail programme will be published in the C.A. quarterly magazine.

Committee (2022):

Chairman: Peter Jones

Secretary: John Aylmer

Treasurer: Malcolm Dee

Member: Jim Hibbert

Member: John Peregrine

Member: Jayne Tracey

If you would like further details, please visit our website:

www.camsail.org.uk

or contact us at: enquiries@camsail.org.uk

CAMSAIL is a club which meets monthly from October to March to enjoy a wide range of illustrated talks, given by invited speakers and club members, and provides an opportunity to socialise in a nautical atmosphere (albeit in central Cambridge!).

Our monthly meetings are on Wednesday evenings at 19.30 for 19.45. We meet in the Cambridge and County Bowling Club, Brooklands Avenue, CB2 8FG. The club is situated towards the west end of Brooklands Avenue on the north side, and parking is available there. There is a bar open before each meeting; tea and coffee are served after each meeting.

There is an annual subscription of £20 (to cover the cost of the venue and speakers' expenses), but those new to us are welcome to attend one meeting without charge or any commitment to join.

Oct 12th: Galloper Offshore Wind Farm

Sean Chenery: Galloper Offshore Wind Farm is situated off the Suffolk coast and produces 353MW which is enough to power 380,000 homes. Sean Chenery the General Manager will talk about day to day operations based from the Operations & Maintenance Base in Harwich, the future growth of offshore wind off the Suffolk coast and what requirements are placed on the operator to monitor and report the impacts of such operations.

Nov 9th: Fastnet 1979: A lesson from the past

Dr Imre Vadasz: The 1979 Fastnet race proved a milestone in ocean racing history. An exceptional storm hit the fleet of 303 yachts in the Irish Sea, turning an amateur sailing event into a maritime disaster. 24 boats were abandoned and 15 participants lost their lives. The lessons learnt lead to improved designs, equipment and safety regulations. There have been great advances in technology, navigation, communication and weather forecasting. Even so, the forces of nature remain challenging and a story about how one boat coped with the storm, what life was like on board, should be of interest to all yachtsman, cruising or racing.

Dec 14th: Members' Evening

Camsail AGM; election of Committee; a chance to share sailing experiences and to get to know other members better (with Christmas refreshments), including reports from any Camsail trips since last season.

Jan 11th: Lessons Learnt

Charles Joint: In 1994 I was serving with the United Nations in Kuwait/Iraq. During my occasional time off, I joined the Kuwait Offshore Sailing Association which was being re-built following the Iraq invasion. I was invited to help with a yacht delivery from Dubai to Kuwait City. In hindsight I learnt a lot from a fishing net – come and hear what happened!

Feb 8th: The Woodbridge Boatyard

Eric Reynolds: A.A Everson began boat building in Woodbridge in 1889. Well known for a number of “one-off” yachts and motor launches, Everson's also produced one of the first series production yachts on the East Coast, the 21ft. “Cherub” Class built between 1924 and 1937. In 2010 the name was changed to ‘The Woodbridge Boatyard Ltd.’ Many improvements were implemented. In April 2019, The Woodbridge Boatyard was acquired by Eric Reynolds, Founder of ‘Evolution Yachts’, current Chairman of ‘Save Britain's Heritage’.

Mar 8th: How the Anglo Saxons crossed the North Sea

Paul Constantine: This question is one which intrigues historians and archaeologists, for the answer remains unknown. The Anglo-Saxons must have arrived in boats, but none had been found. There was a 500 year, Roman – Viking gap in ship-construction discoveries. A mystery called the Dark Ages obscured the very people who gave their name ‘Angle-land’ to this country. Only a single Anglo-Saxon ship has been found and this is its story.
